

Open API - Read / Write Permissions

Admin Users can manage Read and Write permissions

Technical Documentation

Please refer to <u>Syncore API</u> documentation for complete technical documentation.

Users

Admin Users.

To manage Read and Write permissions:

 Select Syncore Settings from the side menu. The Syncore Settings page opens.

Syncore Settings	Enable API write Allows API Write operations					

Two toggle switches are under Manage API:

- i. Enable API Read: Allows API Read operations (when enabled)
- ii. Enable API Write: Allows API Write operations (when enabled)
- 3. Select toggle(s) to enable and disable API Read and Write operations.

NOTES:

- i. API Read switch is enabled by default for existing and new Partners who have API keys generated.
- ii. Enabling API Write will also enable API Read.
- iii. Disabling API Read will also disable API Write.
